The KGASLS-GIV are great alto saxophones, they are made by a TAIWAN company, and the quality is excellent. After years of developing saxophones and looking for the perfect manufacturer, things have come together. These are our best saxophones in every way, great intonation, great response, great fingerboard design and feature 2 necks.

\*1 neck with the traditional neck brace and the other with the Rheuben Allen Freedom/Power neck brace with only two small solder joints to allow the neck to vibrate better.

\*This model also features a silver plated bell, bow and neck giving it a very good tone color.

KGASLS-GIV G-Series Alto Saxophones are the Professional saxophones designed by Rheuben Allen and Kenny G. This is the last in the line of Kenny G saxophones and are the best we have designed and made to date.

**Case:** The case is made of wood with a Cordura outside and back pack & shoulder straps.
